

A student's potential cannot be confined.

This style guide provides general guidelines for using the BreakFree Education brand, including guidance on brand language, the logo, color palette, fonts, and design elements. If you are working with a professional designer, please share this guide with them.

Brand Story

The story, or central message, for BreakFree Education is language that captures both the function and spirit of your work. Use this language in whole or in parts across communications (website, presentations, speeches, printed materials, etc.) to lend overall consistency to your brand presence.

Every day in America, almost 50,000 young people wake up in a jail cell — some as young as eleven. The vast majority grew up poor, in segregated communities. They've made mistakes — some small, and some serious. And now they spend their days behind bars, largely forgotten. The moment they entered the juvenile justice system, these young people became defined by their past, not their potential.

At BreakFree Education we believe that all children have the right to learn, grow, and dream, so our mission is to radically improve education in the juvenile justice system by investing in the potential and dignity of all its students. We develop quality educational programs that inspire and engage students held in confinement. We partner directly with juvenile justice agencies across the country, providing the resources, training, and networks they need to make school relevant and meaningful, so students can build a successful life when they leave.

We started and continue to support the Travis Hill School in New Orleans, where young people held in the adult jail and juvenile detention center work towards their high school diploma; upon release, we provide students with the care and resources they need to determine their futures.

We work with policymakers to shape the world we want to see — one where these young people have education and support to reach their full potential.

For too long, the education and juvenile justice systems have failed our students — we aim to change this. So we are constantly creating, advocating for, and implementing solutions that put our students first. And what we do works. The students we serve learn algebra and conduct physics experiments. They read novels and write poetry, study history and learn how they might shape the future. We see these young people as the scholars they are, serving them with equal parts empathy and high expectations. And when they re-enter society as prepared, empowered citizens, all of our futures are brighter.

"Books/Bars" Mark

The BreakFree Education mark combines a simplified illustration of book spines with the negative space representing the bars of a jail cell.

Primary Logo

The primary logo consists of the "Books/Bars" mark, the logotype "BreakFree Education" and the tagline "A student's potential cannot be confined." The logo lockup with tagline should be used in most applications.

Secondary Logo

The logo lockup without the tagline should be used if the size of the logo renders the tagline unreadable, if the tagline is used separately on the piece, or if it would be redundant to the content.

Please do not alter, redraw, or add any additional words or graphic elements to the logo. Always use approved and provided electronic artwork.

MARK

PRIMARY

A student's potential cannot be confined.

SECONDARY

Clear Space

The BreakFree Education logo should always be afforded a predetermined area of breathing space, referred to as clear space. This ensures that the identity maintains its hierarchy and is not overwhelmed by other visual elements. The clear space equals **x** marked in the primary logo or the height of “BreakFree Education”.

Minimum Size

The logo must always be reproduced so the width of the logo measures a minimum of 1” wide to ensure all elements of the identity are legible. The tagline lockup must always be a minimum of 1.25” wide.

Co-Branding

When the BreakFree Education logo is used to signify a sponsorship, partnership, or affiliation, an isolation area equal to the clear space noted above is needed. The BreakFree Education logo should always appear first in sequence if it is dominant in the partnership agreement. If the BreakFree Education logo is subordinate in the agreement or relationship, the logo should always appear after and adjacent to the other logo, not underneath. The logos must maintain a visual balance.

Logo Colors

Two Color: The CMYK, RGB or PMS version of the logo is preferred. Use CMYK for any print use such as collateral or business materials. Use RGB for electronic use such as PowerPoint projections, digital or TV use. Use PMS for any offset printing needs or when printing signage or apparel that use PMS inks.

One Color: This version should be used when only one color printing is available.

Knockout: A white (or knockout) version of the logo is also available for use on dark color or photo backgrounds.

Black: The black mark is not the preferred mark and should only be used when printing does not allow for multiple colors.

Incorrect Usage

No elements of the logo should be modified. Some examples of what should be avoided are listed here. Avoiding these misapplications helps maintain the visual integrity of the brand and allows for a cohesive look across all materials.

TWO COLOR

A student's potential cannot be confined.

ONE COLOR

A student's potential cannot be confined.

KNOCKOUT

BLACK

A student's potential cannot be confined.

A student's potential cannot be confined.

Maintain the proper proportions of the logo

A student's potential cannot be confined.

Do not use on backgrounds that make the mark illegible

A student's potential cannot be confined.

Do not add a drop shadow or any other special effects

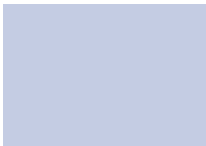

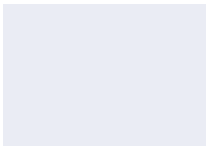

Primary Palette

The primary palette is made up of the colors of the BreakFree Education logo: cobalt and charcoal.

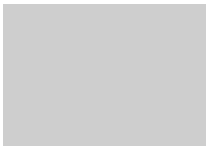

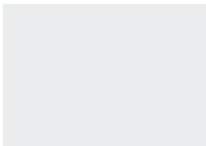

An integral part of the brand are the 75%, 50%, 25% and 10% tones of the palette colors. When designing materials, use the full range of colors to create design elements such as icons, shapes, patterns, charts and graphs.

These color builds should be used to ensure consistency of color across various platforms.

COLBALT

				
CMYK: 100.90.5.0 RGB: 31.58.147 HEX: #1F3A93	PMS: 661 C/286 U	CMYK: 74.60.3.0 RGB: 86.107.173 HEX: #566BAD	CMYK: 45.34.4.0 RGB: 143.156.200 HEX: #8F9CC8	CMYK: 21.15.2.0 RGB: 198.205.227 HEX: #C6CDE3

Typography

Another facet of building a consistent visual style entails incorporating the same fonts throughout all materials. Roboto is the preferred typeface for subheads and body copy. When there is a lot of content for a small amount of space use Roboto Condensed. For headlines and also as part of call-out boxes, side bars and other text, Raleway is the preferred typeface. Roboto, Roboto Condensed and Raleway are available on Google Fonts at no cost and can be downloaded at fonts.google.com.

Many users who are not professional designers will not have access to Roboto, Roboto Condensed and Raleway typeface families. For those who cannot access those typefaces, substitute Arial for all headlines, subheads and body copy. Arial is found in most word processing and presentation software programs (such as Microsoft Word and PowerPoint).

Logo Fonts

The fonts used in the logo are Alegreya Sans and Adelle Condensed. These fonts should not be used for any other applications. Alegreya Sans is available on Google Fonts and Adelle Condensed is available at fonts.com.

Iconography, Logo Pattern and Shapes

The BreakFree Education icons are hand-drawn images that have a variety of thick and thin lines. One Noun Project collection that has a full set of icons in this style can be found here: thenounproject.com/rebelsaeful/collection/education-ink/. To search for other icons use the terms “doodle,” “sketch” or “hand drawn.”

Another element of the BreakFree look and feel is a pattern created from the “Books/Bars” mark. Make sure it is used as a textural element, with muted colors, in designs. For example, when on top of 100% cobalt, the pattern should be 75%. When on top of white the pattern should be 10%. See the Color Palette section for the color builds.

To add depth and brightness use irregular shapes — ovals, circles, jelly beans — to layer behind icons, images or type.

Brand Examples

When creating designs for the BreakFree Education brand play with the various elements as described on the previous page.

When using images, one way to add interest and make them unique to BreakFree is to turn the images into monotoes using the primary Cobalt color. To highlight an area of the image, overlay with an irregular shape and use the “Multiply” effect to add transparency.

When using icons, place them on top and off-center of the irregular shapes. Make sure there is always contrast between the background, shape and icon.

When creating layouts play with the scale of the elements. The irregular shapes can be used to frame content and add visual interest behind elements. Use lines to create structure within the content.

THANK YOU
